FIRST ANNOUNCEMENT

The conservation of native crayfishes is one of the major challenges in inland waters of Europa. Most species are endangered by many factors, but specifically by introduced species and pests. This symposium will focus on recent research advances, and also on management strategies and specific experiences to achieve a long term conservation of our native freshwater decapods..

Scientific Committee

Javier Diéguez-Urbeondo, CSIC, Spain
Leopold Füreder, University of Innsbruck, Austria
Lennart Edsman, Swedish University of Agricultural Sciences, Sweden
Laura Aquiloni, Itinera C.E.R.T.A. scarl, Italy
Satu Viljaus, Satu Viljamaa-Dirks, Evira Kuopio, Finland
Japo Jussila, University of Kuopio, Finland
Pavel Kozak, University of South Bohemia, Czech Republic
Fernando Alonso, Junta de Castilla La Mancha, Spain

Open list of topics

Crayfish biology and ecology
Conservation programs
Alien crayfish management
Crayfish plague biology
Conservation aquaculture
LIFE projects on crayfish conservation

(Please, contact the organization to propose other topics)
